1)

a) 08040000 : Text

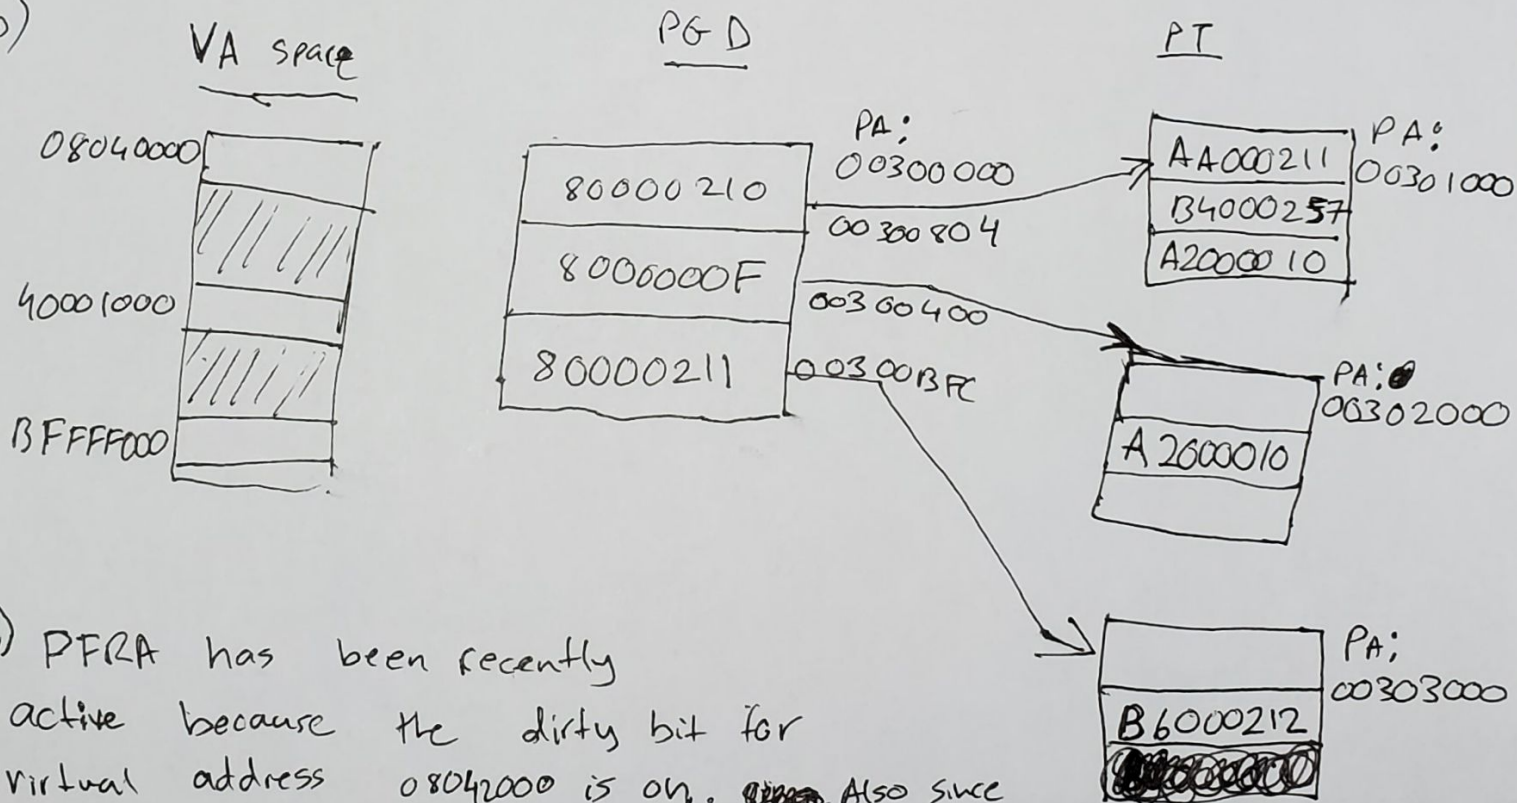

08042000 : Data

08044000 : BSS

40001000 : User Created Other

BFFFFFF000 : Stack

b)

c) PFRA has been recently active because the dirty bit for virtual address 08042000 is on. ~~Also~~ Also since the user ~~memory~~ memory region points to the same page frame as BSS, PFRA ~~was~~ was active. The page frames 0022000 and 0024100 ~~are~~ might be candidates for paging out and reclamation because their access bits are on.
